

Think Before You Shrink

This year, why not try a reusable cover?

Did You Know....?

- Semi-custom covers for most boats under 30' cost the same as shrink-wrapping for two seasons.
- Reusable covers can last as long as 5 - 10 years.
- Canvas shops can repair and clean reusable boat covers extending their life even further.
- Installing a reusable cover on a small boat is easy and protects as well as plastic.
- Semi-custom reusable covers are available via online retailers for many boats.
- Recycling shrinkwrap material is costly, time consuming, and difficult.

Ask your marina or local marine retailer for help purchasing, cleaning or repairing your cover. A list of marinas and canvas workers can be found on the Marine Trades Association of Maryland website or in the Guide to Marine Services produced by MTAM each year. (mtam.org or 410-269-0741).

REFUSE > REDUCE > REUSE > Recycle
